Q2IDv5.5 Installation for Windows

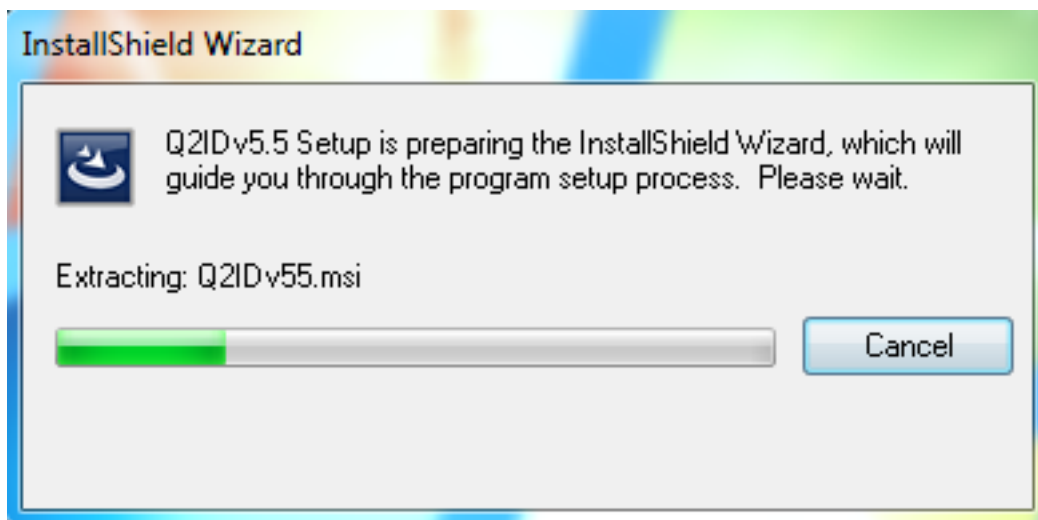

Q2ID Win Installation & Activation

Q2ID Win - Starting the Install

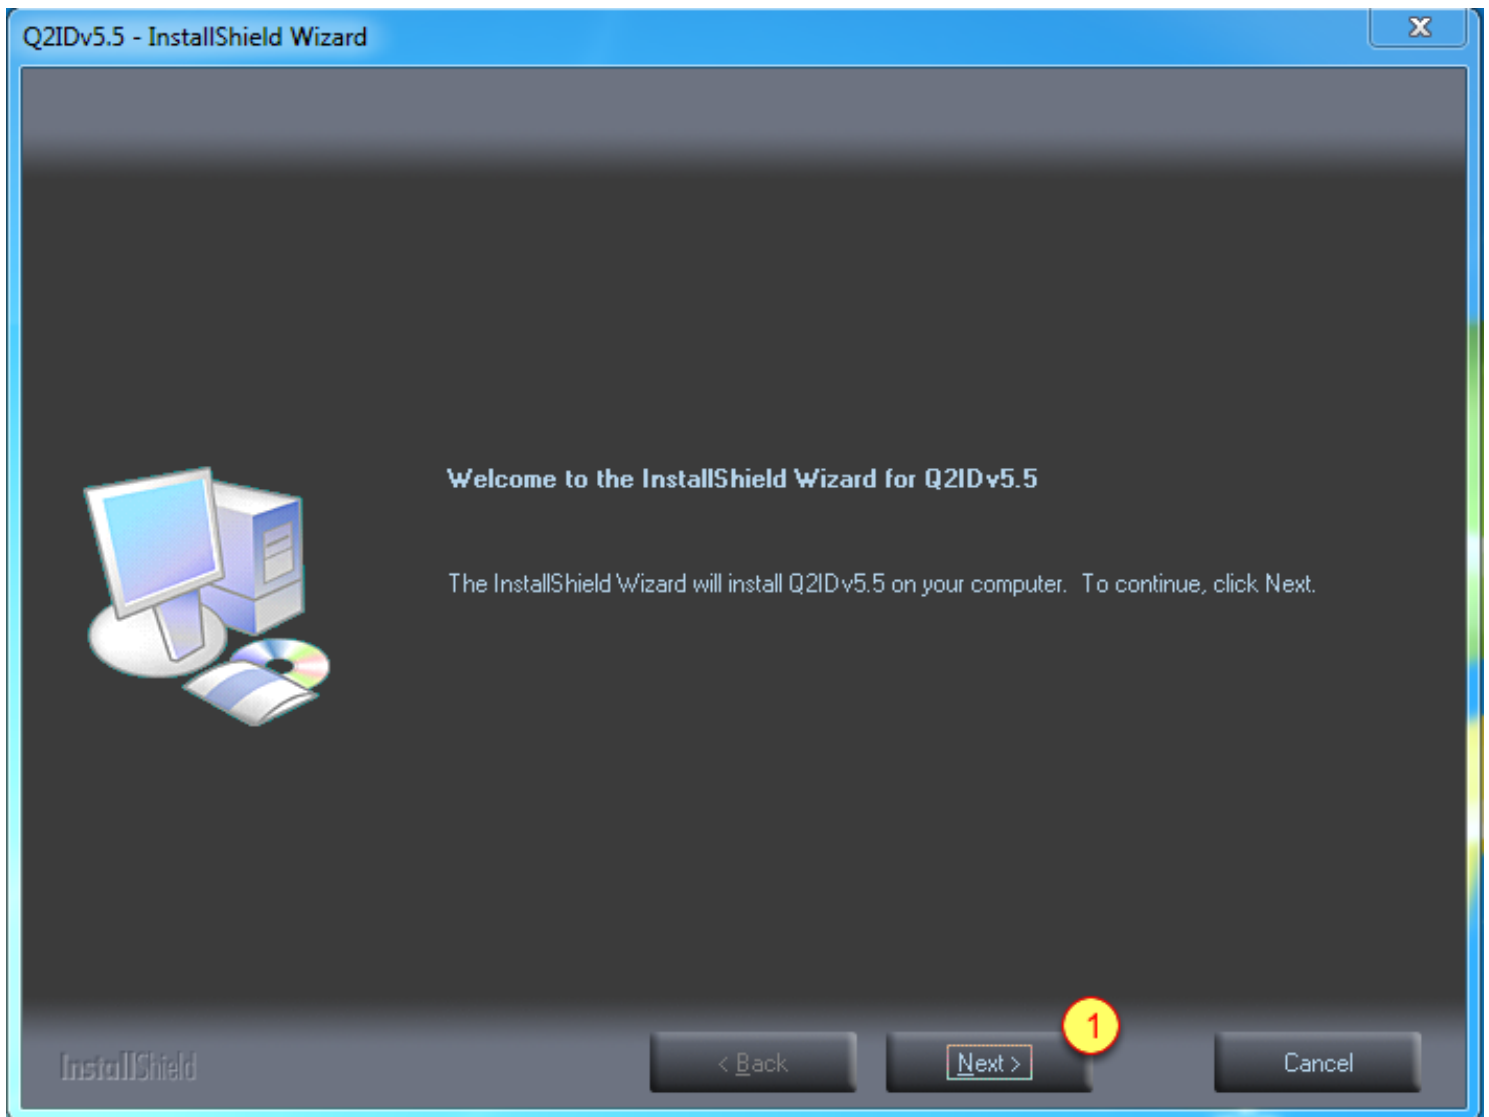

Double-Click on the Q2IDv5_50_XX_Win_Installer.exe icon to launch the Q2IDv55 Installer.

Q2ID Win - The install Wizard starts up

Q2ID Win - Begin Installing Q2ID

When the Q2IDv5.5 - InstallShield Wizard window appears, click on the Next button (1) to proceed.

The Q2IDv5 - InstallShield Wizard window may take several seconds to appear, so please be patient.

Q2IDv5.5 - InstallShield Wizard

Customer Information
Please enter your information.

User Name:
1 My Name

Company Name:
2 My Company

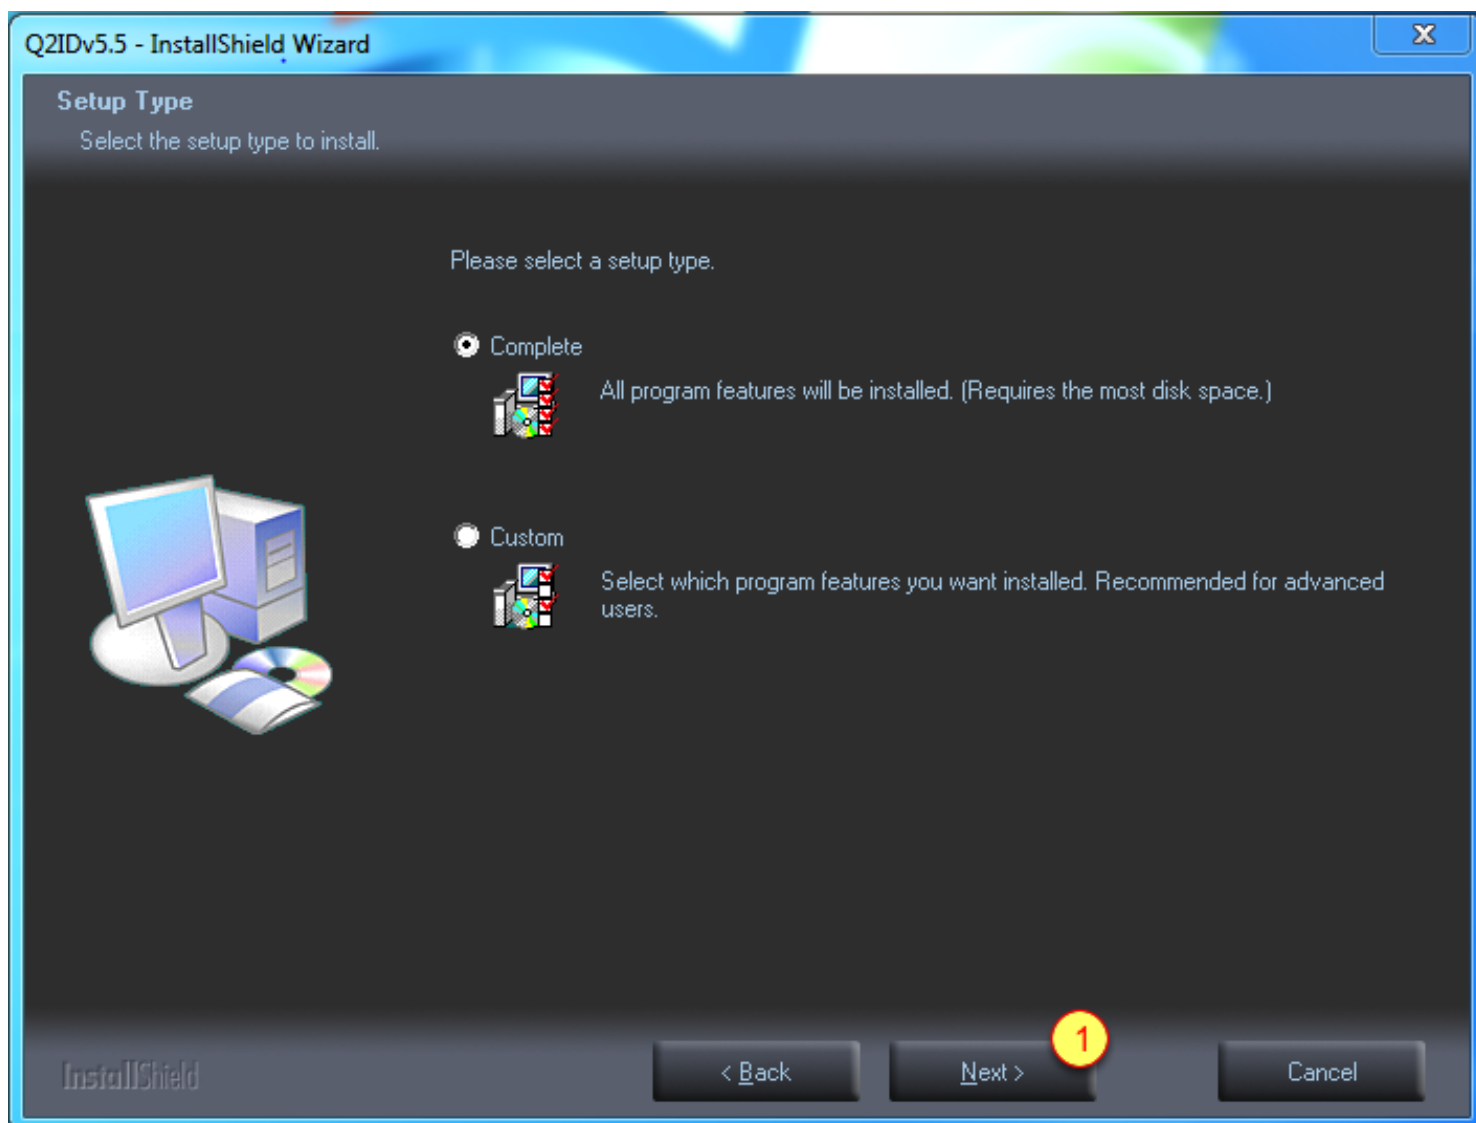

Install this application for:
3 ☒ Anyone who uses this computer (all users)
☐ Only for me (QA)

< Back Next > 4 Cancel

In the Customer Information screen, enter in your Name (1) and Company name (2). This information is stored on your local computer as part of the installation record.

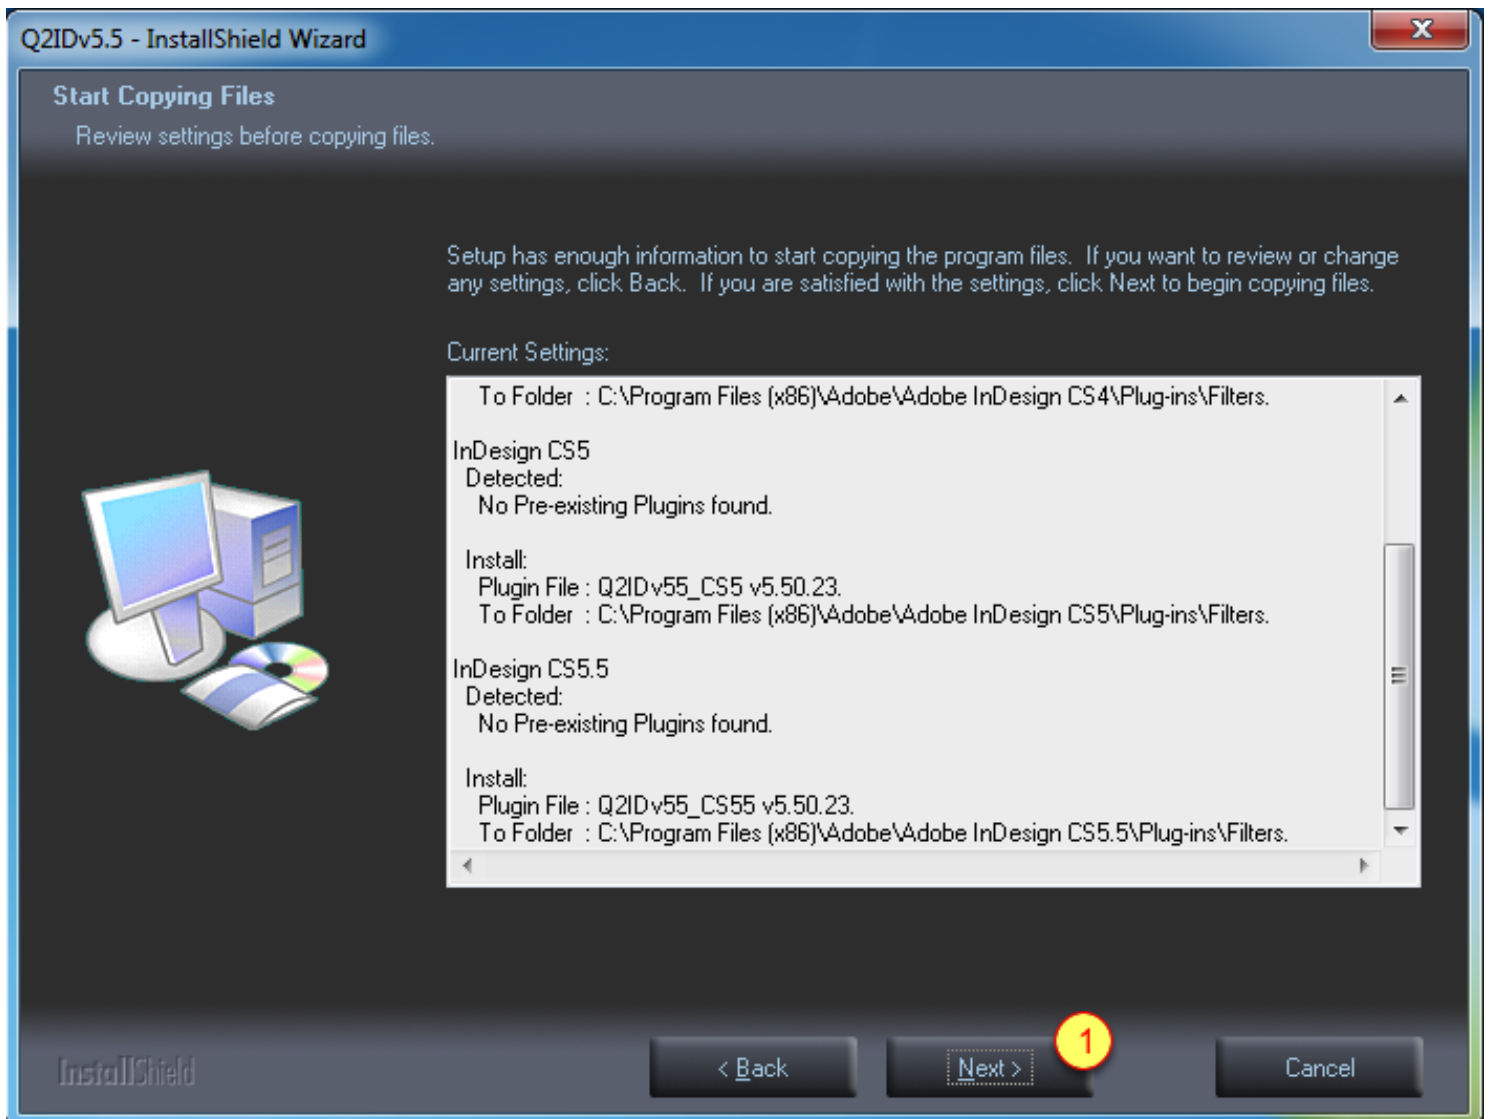

Next select whether you want Q2ID to be available for all users of the computer or just for your account. By default this is set to Anyone who uses this computer (all users) (3). Finally click on the Next button (4) to continue.

Q2ID Win - Type of installation

Select Complete for installation type. Then click on the Next button (1) to continue.

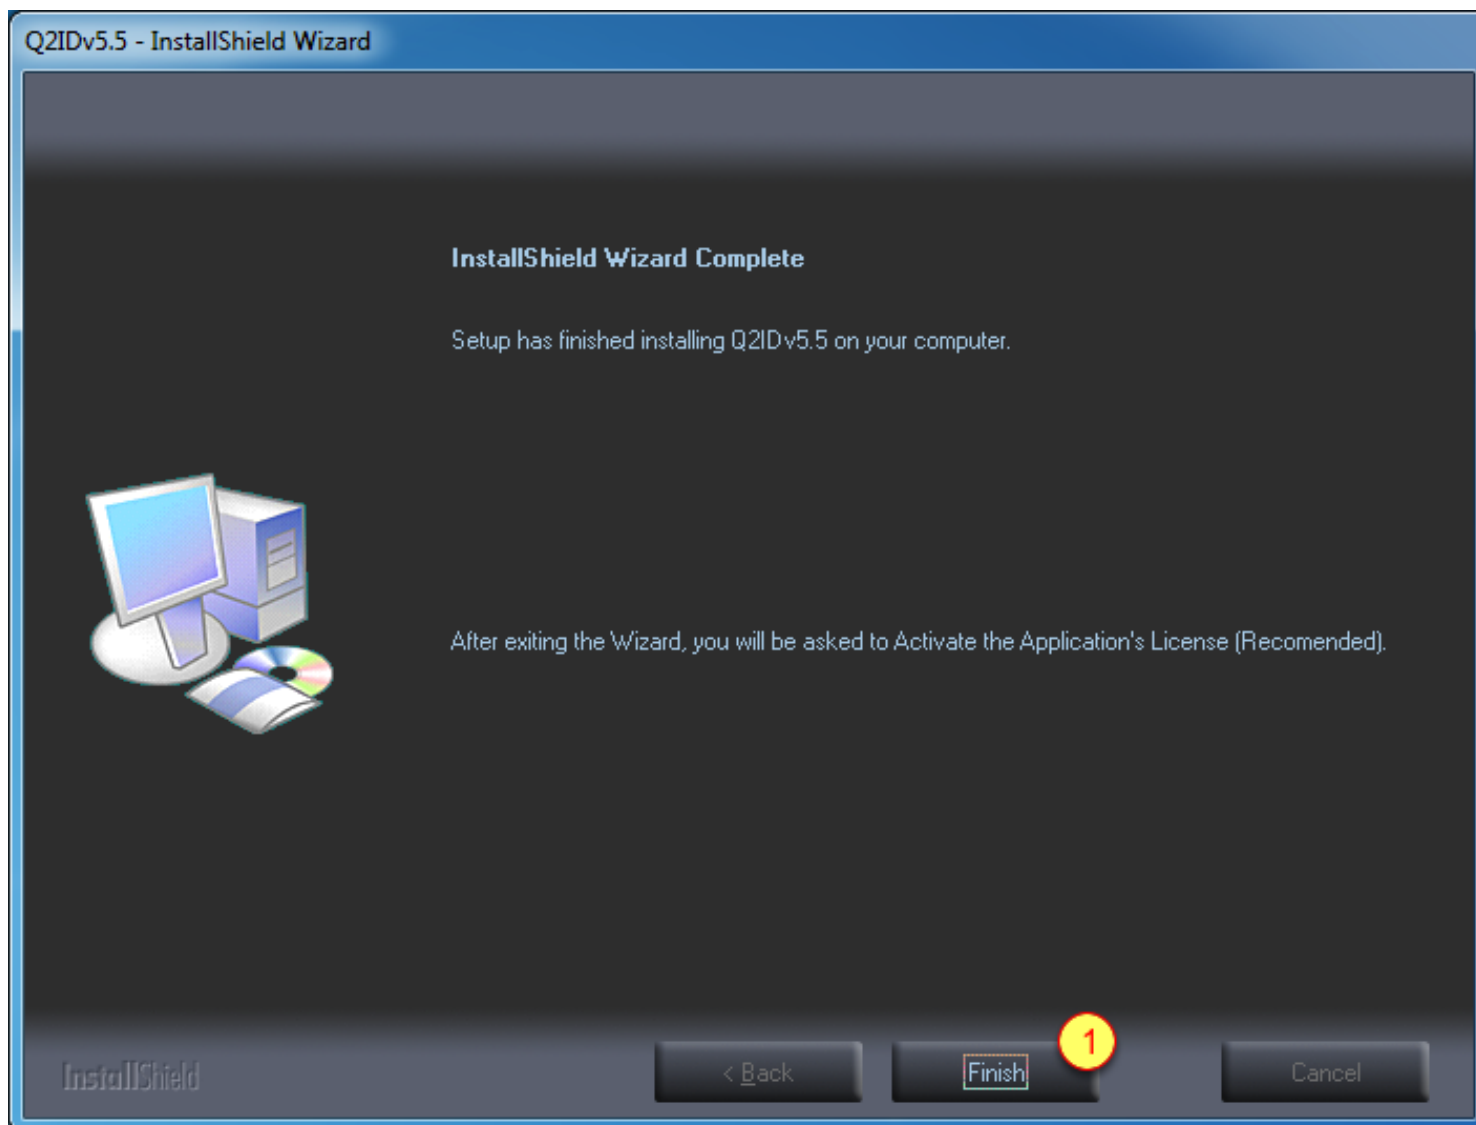

Q2ID Win - What will be installed

You will now see a list of what will happen during the install. Click on the Next button (1) to continue with the installation.

The Q2IDv5.5 Installer for Windows will automatically detect which versions of InDesign you have loaded on your computer and will install Q2ID into all supported versions.

Q2ID Win - Installation process has completed

When the Q2IDv5.5 Win-Installer has finished you will see the window above. Click the Finish button (1) to close the installer.

Q2ID Win - The LicenseControl Window

After you click the Finish button and close the installer, you will be presented with the LicenseControl window for Q2ID. It may take several seconds for the LicenseControl window to appear. Initially Q2ID will be Unlicensed (1).

Q2ID Win - Boxed Product License Code Entry

Q2IDv5.50 - Licensing by LicenseControl

Q2ID Activation
License Status: **Unlicensed**

☒ **Provide/Paste a Licensing ID:**

00(59

☐ Find this Application's License and Activate It

☐ De-Activate this Application's License (*I'm Changing Systems*)

☐ Show the Status of this Application's License ID

[To purchase a full licensed version of Q2ID click here](#)

Done Next 1

If you purchased a boxed product and or did not receive your License ID in electronic format, you may enter in just the **numeric portion** of your License ID as illustrated above. The numeric portion of your License ID consists of all of the numbers to the right of the letters **sngl** in the full License ID.

After entering the numeric portion of your License ID, click on the **Next** button (1) to continue.

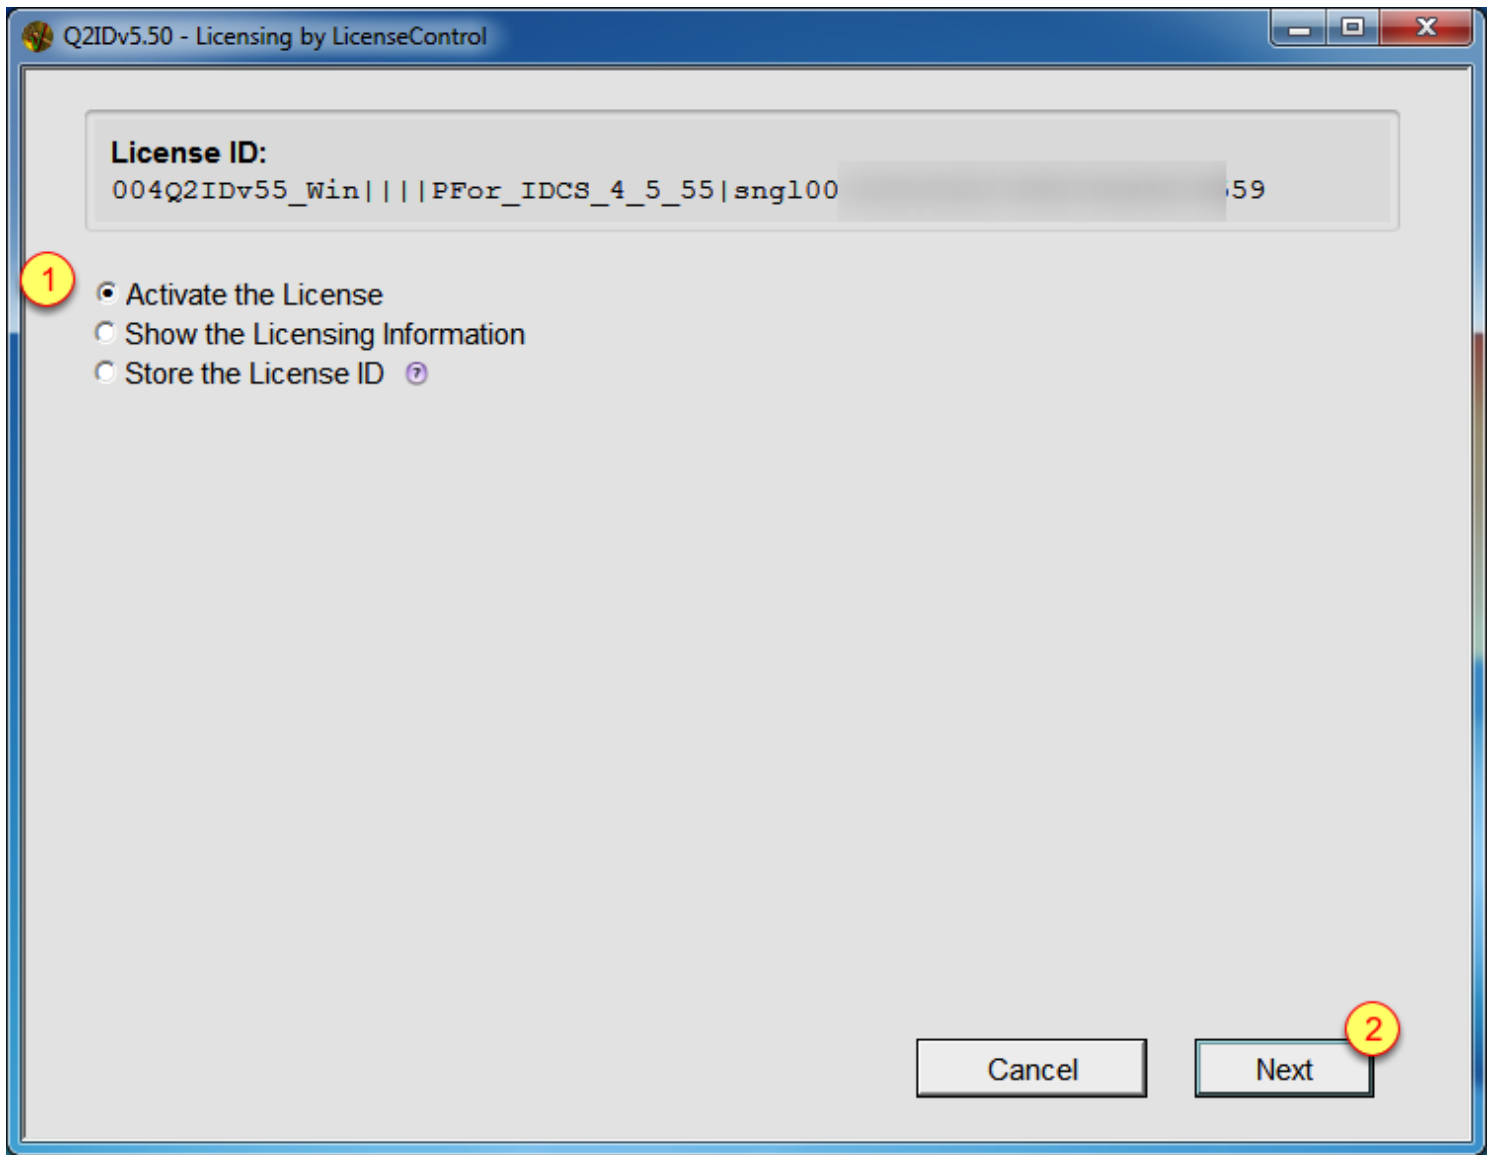

Q2ID Win - Enter your License ID by Copying and Pasting

If you received your License ID in an email, copy and paste your full License ID into the **Provide/Paste a Licensing ID** field (1), then click the **Next** button (2) to continue activating Q2ID.

****IMPORTANT NOTE**** - **Control-V DOES NOT WORK** with LicenseControl. You must **Right-Click** and then select **Paste** from the menu in order to Paste your License ID into the appropriate area.

Q2ID Win - Select Activate the License

If you entered a valid License ID you will see the above screen. Select **Activate the License** (1) and then click on the **Next** button (2)

Q2ID Win - Boxed Product Registration Screen

Please provide the information below. An entry is required for the red items. Although the information does not have to be accurate, if any support is required, you will need to provide the same name or email address or your License ID before we will be able to locate your licensing information when providing support.

Name:

Email Address:

Postal Address:

Day Phone:

Other Phone:

Fax:

Where did you purchase this product?

Comments:

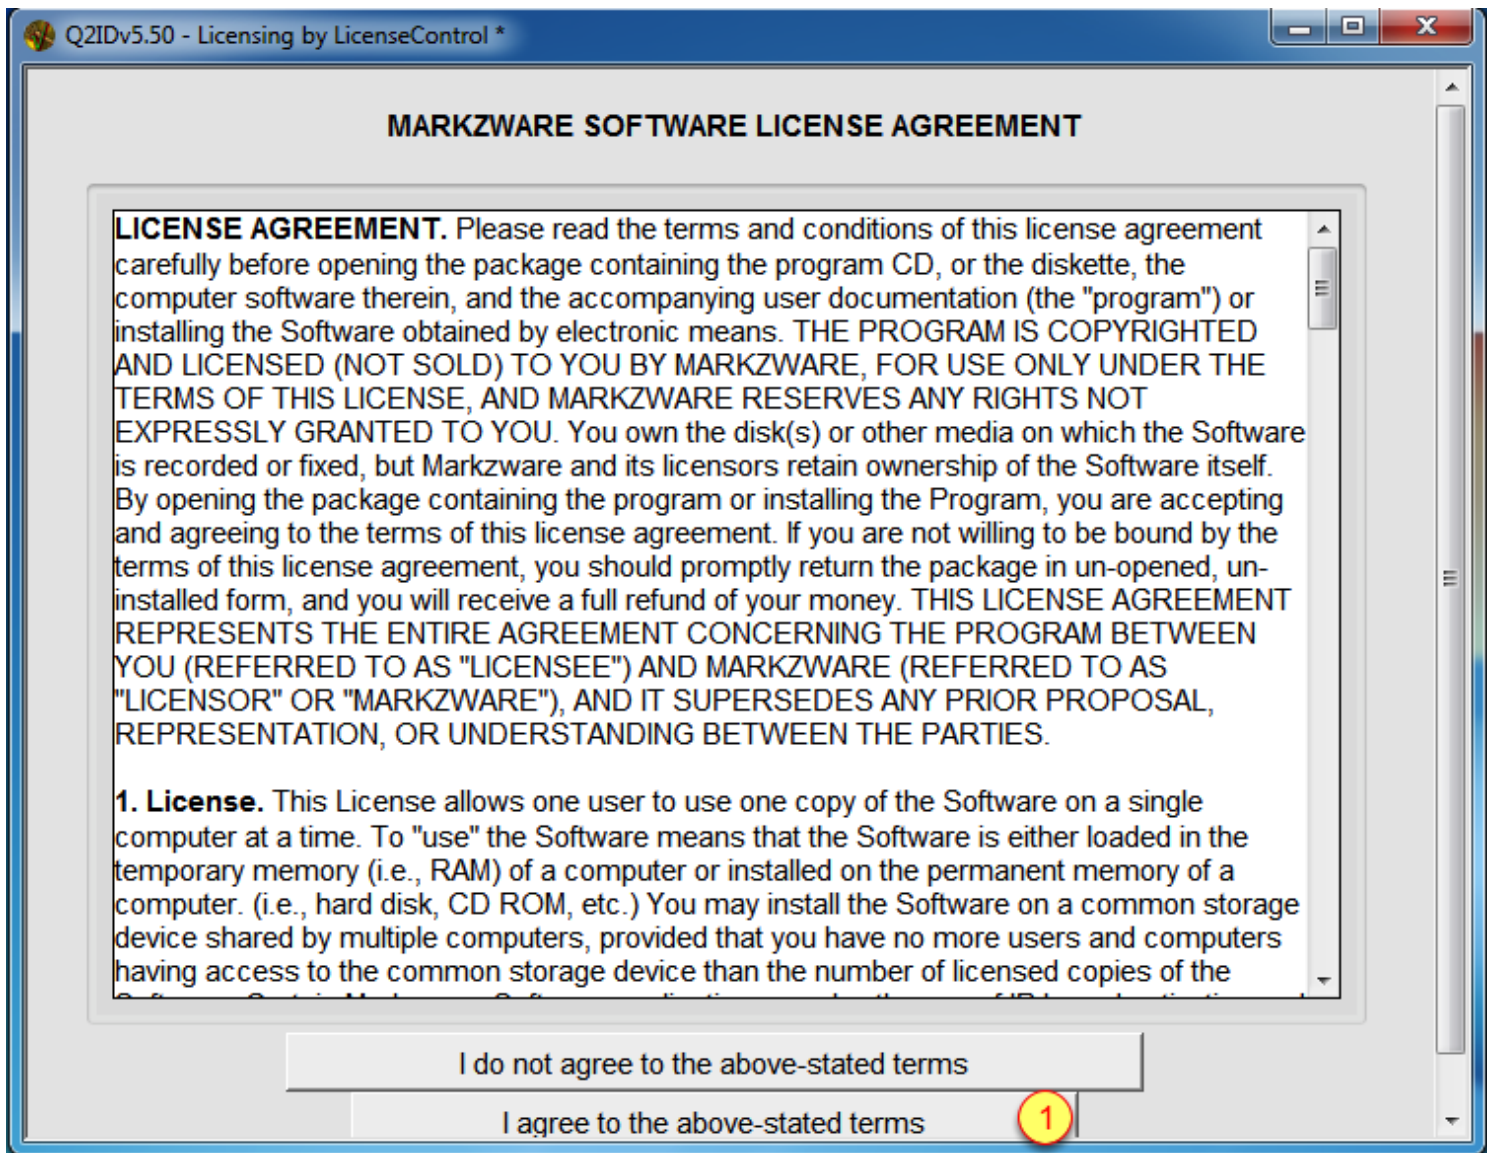

☒ Use Secure Communication

Cancel Send Information 1

If you purchased a boxed version of Q2ID, you will be presented with an extra screen when you activate the product. The **fields in red are required** (Name and Email Address).

Please enter accurate information, as this information is used for Tech Support purposes. If you enter bogus information here, there is a very good chance you will need to re-purchase Q2ID if you contact us for Tech Support as we will not have a valid and accurate record of who you are and how to contact you, thus we will not be able to provide you with Tech Support.

Once you have filled in at least your name and email, click on the Send Information button (1) to continue.

The last piece that needs to be handled before you activate Q2ID is to read and agree with Markzware's Software License Agreement. If you do not agree with the License Agreement, you will not be able to activate your copy of Q2ID.

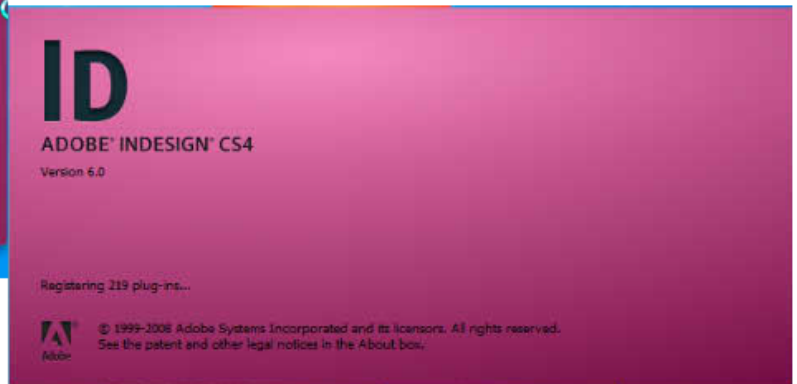

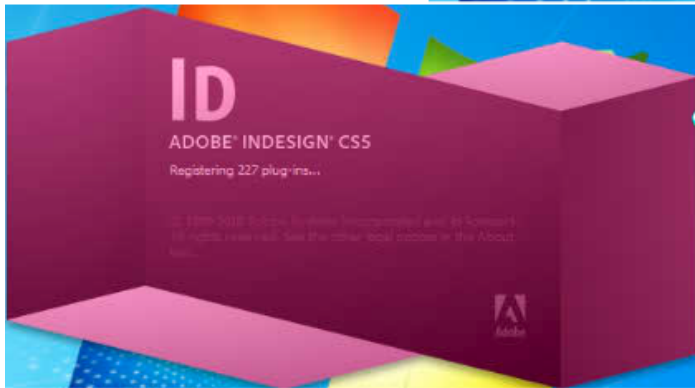

To activate your copy of Q2ID, click on the **I agree to the above stated terms** button (1).

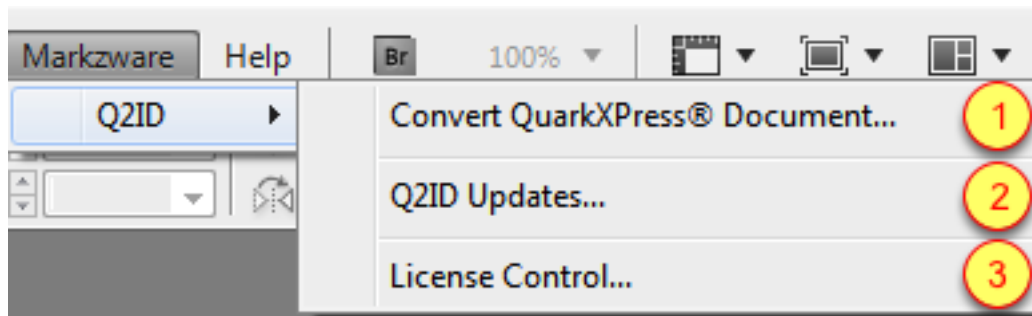

Q2ID Win - You are now licensed

After successfully activating Q2ID, you will see a status of Licensed for this system (in green text). You are ready to go! Click on the **Done** button (1) to close the LicenseControl application and window.

Q2ID Win - Start up InDesign and start converting!

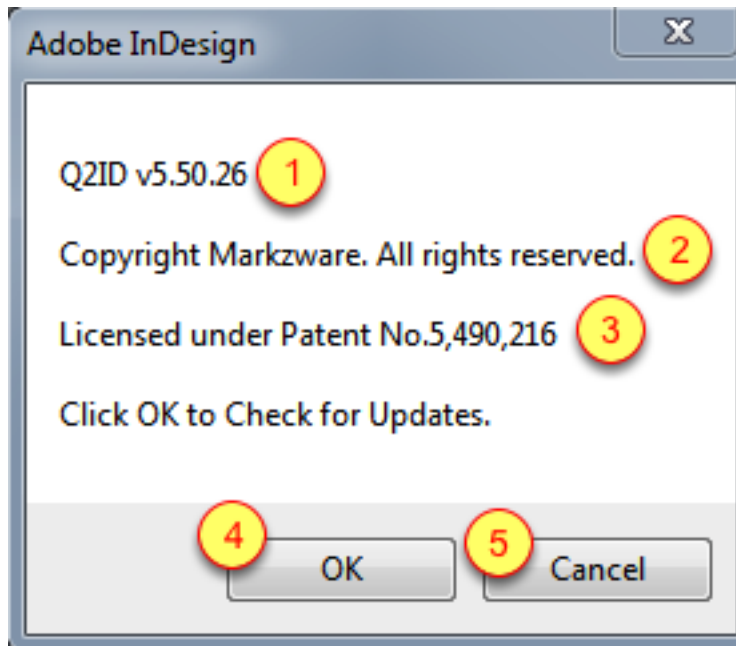

Once Q2ID has been installed you will see a Markzware/Q2ID menu. Under this menu there are three items:

1. Convert QuarkXPress® Document... - Select this to bring up an Open File window and select the Quark document you want to convert.
2. Q2ID Updates... - This will bring up an About window with a link for checking for updates, and show you the version of Q2ID you are running
3. License Control... - This will bring up the LicenseControl application for Q2ID. With LicenseControl you can see how many activations you have and most commonly this is used to deactivate Q2ID if you want to use it on another computer or move it to another computer.

Besides using the Convert QuarkXPress® Document... menu item to convert a Quark document, you can also use InDesign's built in File Open command, just select File Open or use Control-O and now Quark documents are available to be opened. Q2ID has no popup menus or other distractions to get in your way when you want to convert documents. Simply select a Quark file and you will see a Q2ID progress window. Once the file has converted, Q2ID steps out of the way and you are in InDesign and can edit or modify your converted file just as you can any other InDesign file.

If you click on the Q2ID Updates... menu item you will be presented with a new window. This window contains the following items:

1. The version number of Q2ID - this is handy in case you need Tech Support
2. Markzware Copyright notice
3. Licensed patent information
4. **OK** button - clicking this will take you to the Markzware Installer & Updater page where you can download the latest official release of Q2ID. This is handy if you need to re-download Q2ID and your online store link has expired.
5. **Cancel** button - this will close the window

Q2ID Win - Deactivating and Uninstalling under Windows

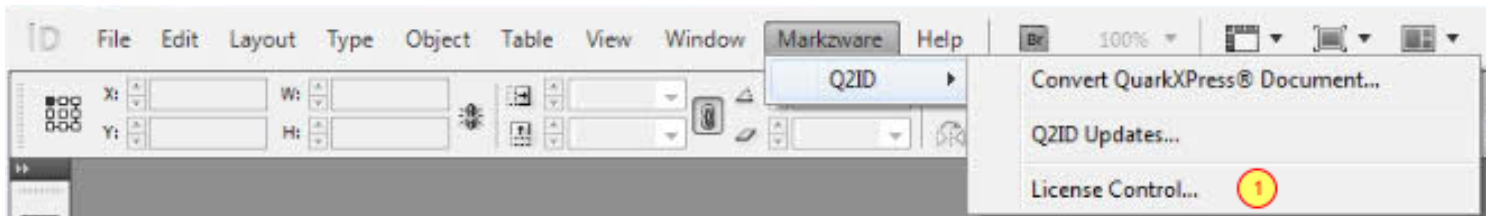

Deactivating Q2IDv55 requires an internet connection.

Q2IDv55 uses a standard Windows Uninstall process. You will need access to your Control Panel for Windows in order to uninstall Q2IDv55

Why would you want to deactivate Q2ID?

1. You want to use Q2ID on another computer. Deactivating Q2ID on your current computer will free up your License ID for use on another computer.
2. You are planning on sending your computer out for repair. Just to be on the safe side, it is a good idea to deactivate Q2ID before you send your computer out for repair.
3. You are planning on retiring, selling or giving away your computer. Please make sure you deactivate Q2ID before retiring, selling or giving away your computer, if you don't deactivate, you are throwing or giving away your License to use Q2ID.

001 - Q2ID Win - Begin deactivating - Bring up LicenseControl for Q2ID

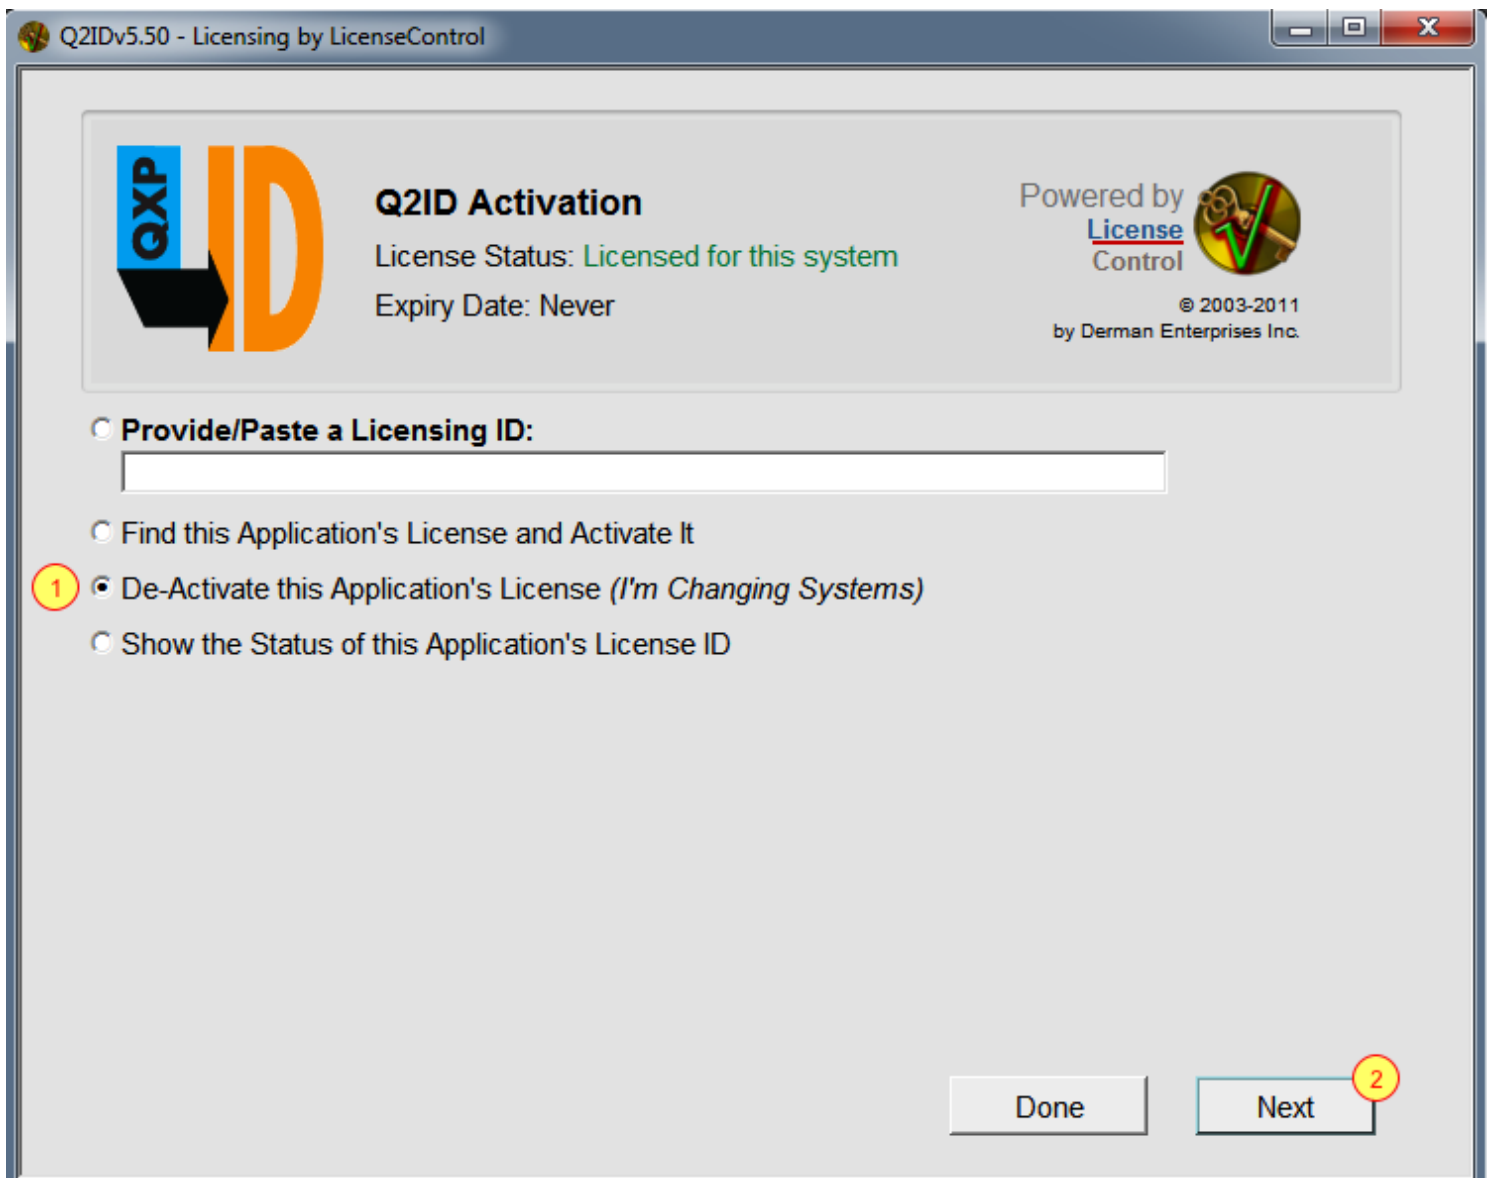

To begin the deactivation process, select License Control... (1) from the Q2ID menu.

002 - Q2ID Win -The LicenseControl Window

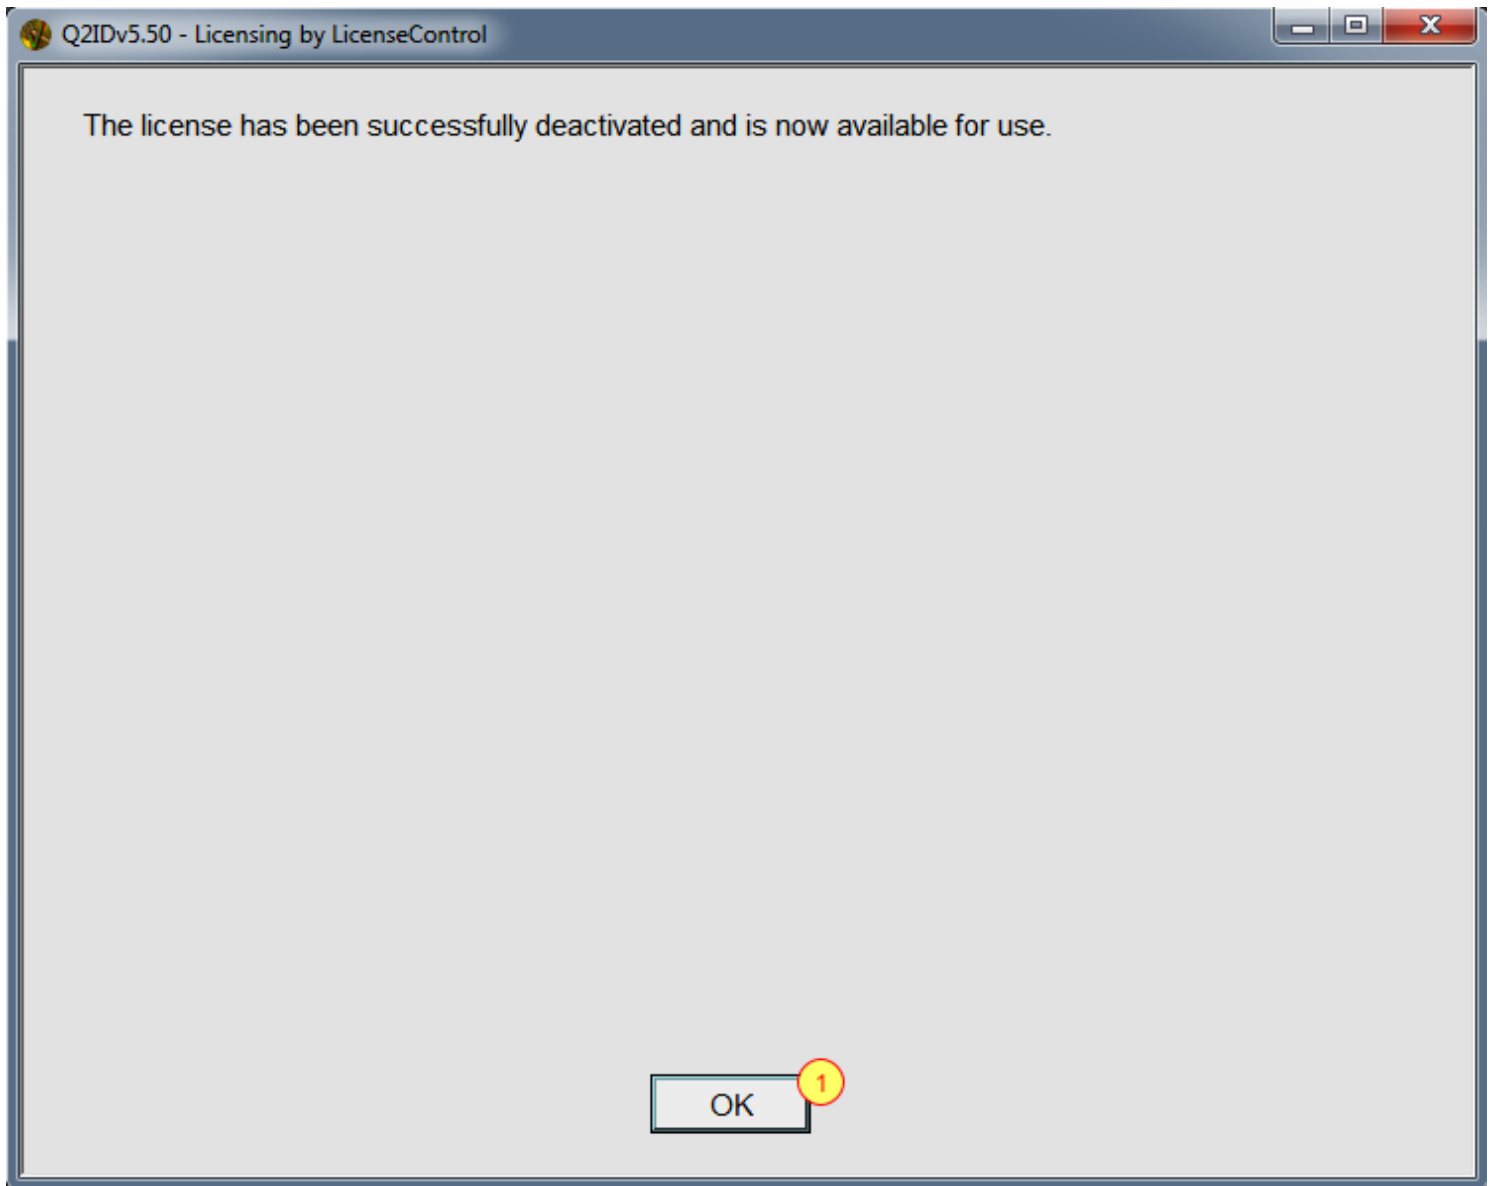

If you have been using Q2ID, then it has been activated and will have a status of Licensed for this system (1)

Select **De-Activate this Application's License (*I'm Changing Systems*)** (1). Then click on the **Next** button (2) to continue.

Important - You must be connected to the internet in order to deactivate Q2ID.

004 - Q2ID Win - De-Activation Confirmation Message

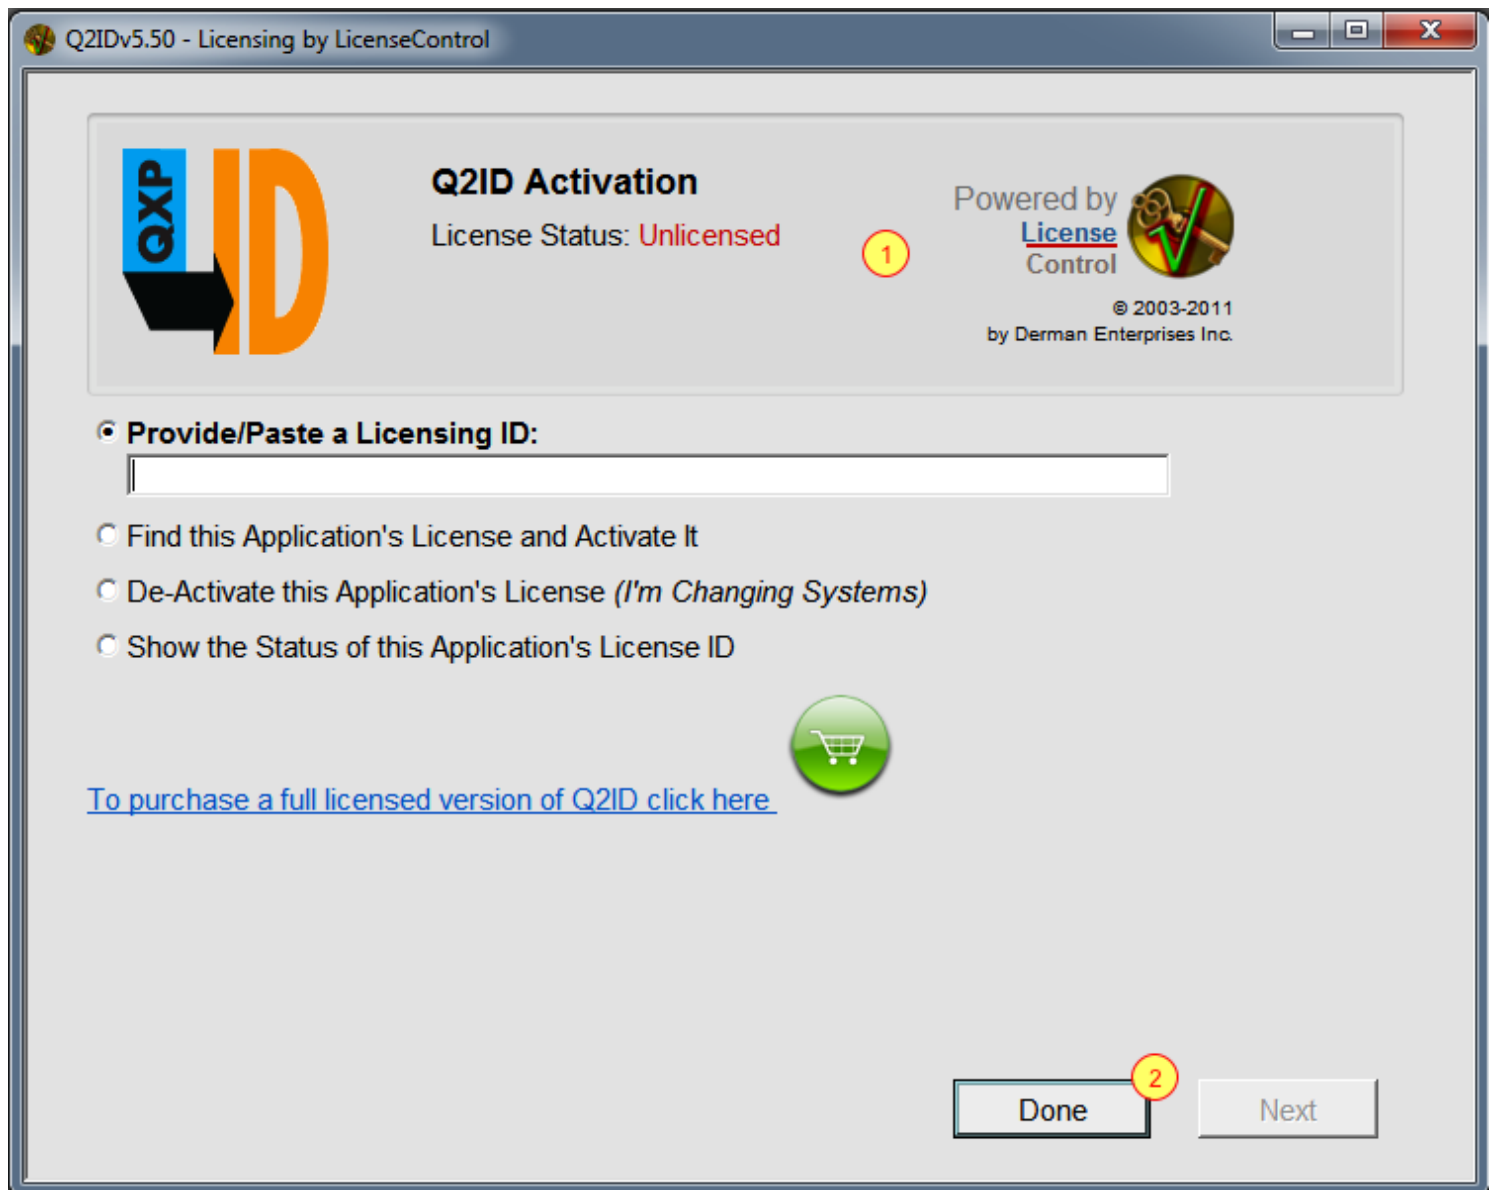

If you have successfully deactivated Q2ID you will see the above confirmation screen. Once deactivated, you can use your Q2ID License ID on another system, or move Q2ID to another system.

If you want to re-activate Q2ID you will need to have your License ID available, so it is best to enter it into a text file and copy-and-paste it into the required area when reactivating Q2ID.

***Control-V does not work with LicenseControl on Windows, you must place your cursor into the Provide/Past a Licensing ID area and Right-Click. Then select Paste from the popup menu.*

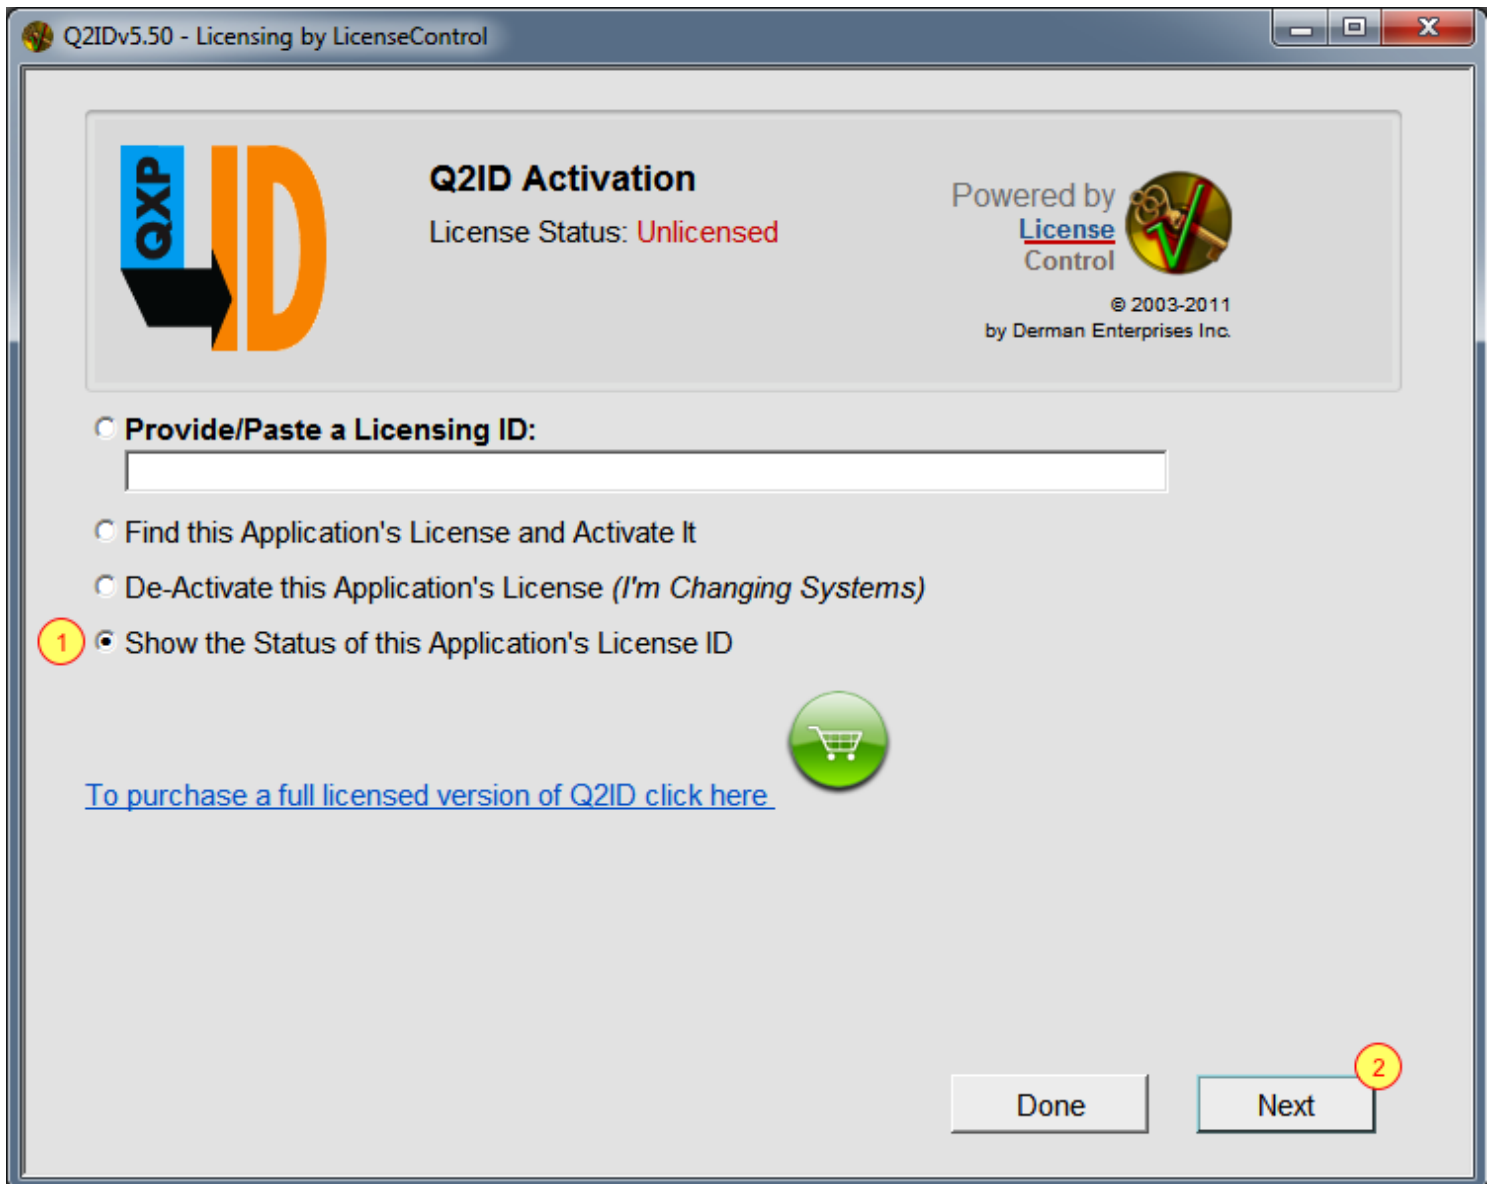

Click the **OK** button (1) to continue.

Once you are fully deactivated the status on the LicenseControl window for Q2ID will show as Unlicensed (1).

Click the Done button (2) to close the LicenseControl window.

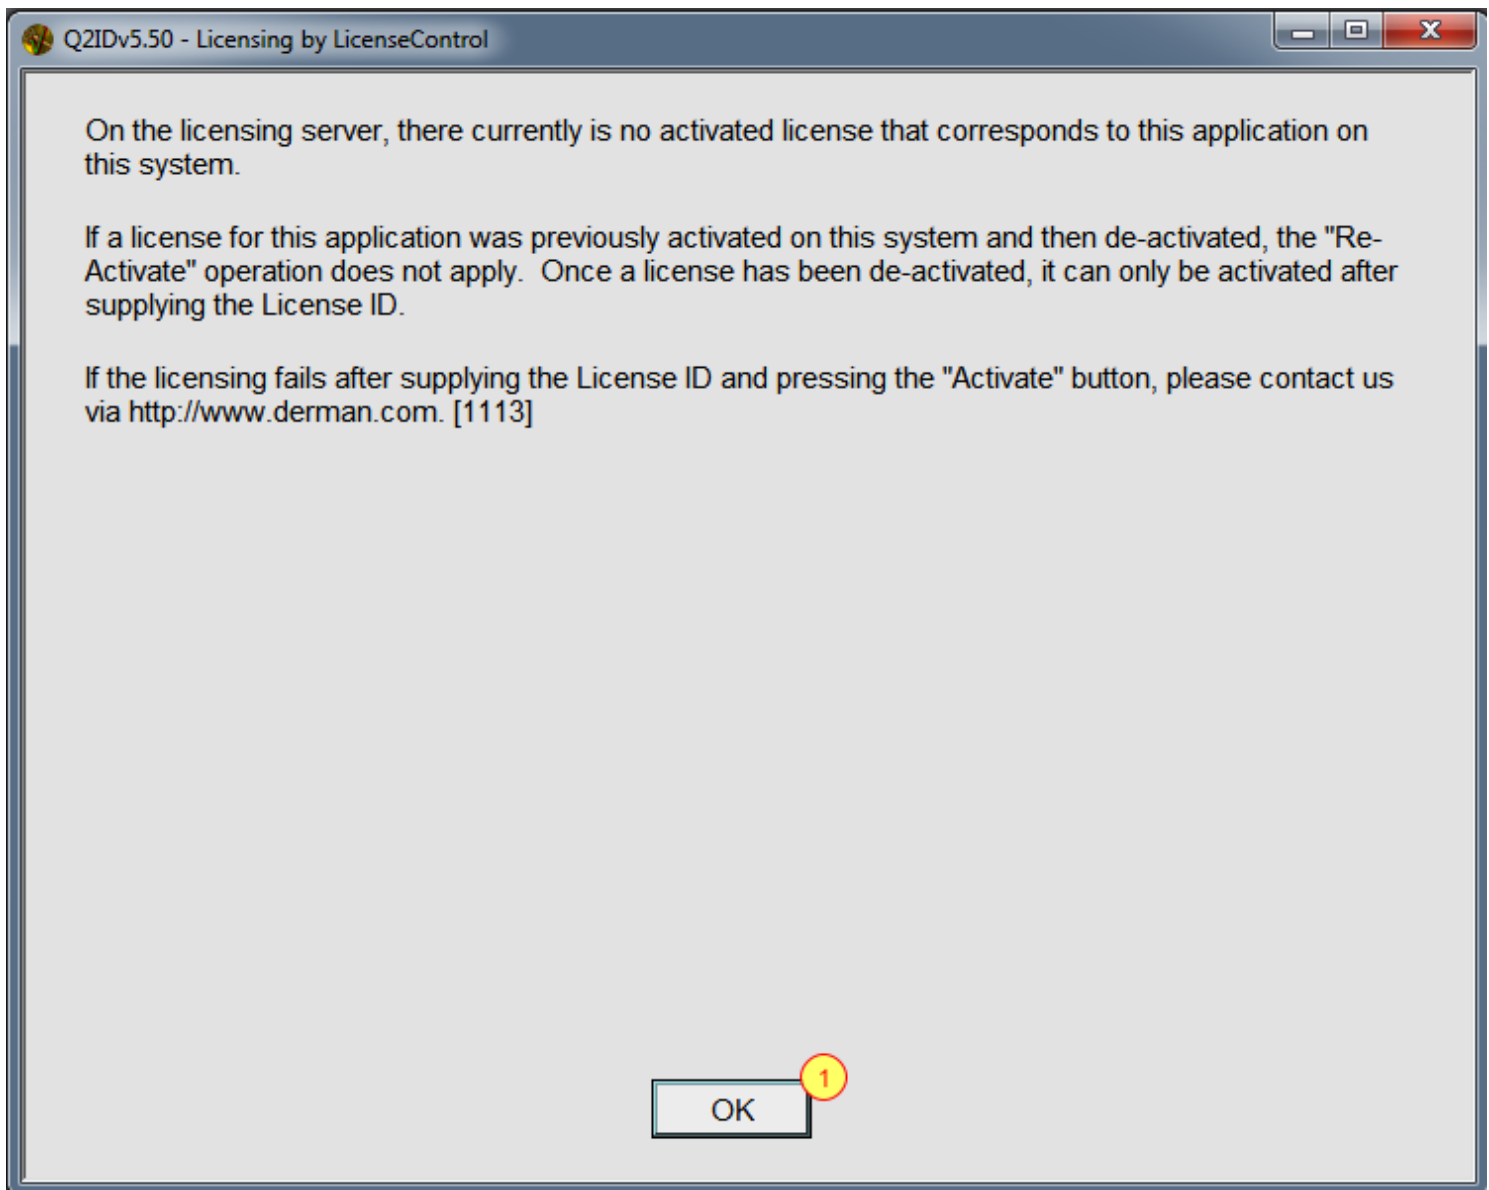

006 - Q2ID Win - Confirmation of deactivation (optional)

If you wish to make sure you are deactivated and unlicensed, select **Show the Status of this Application's License ID** (1) and then click on the **Next** button (2) to view the results.

You must be connected to the internet to perform the above actions.

007 - Q2ID Win - No activated license for this application

You should receive the above message that there are no activated licenses for this application.

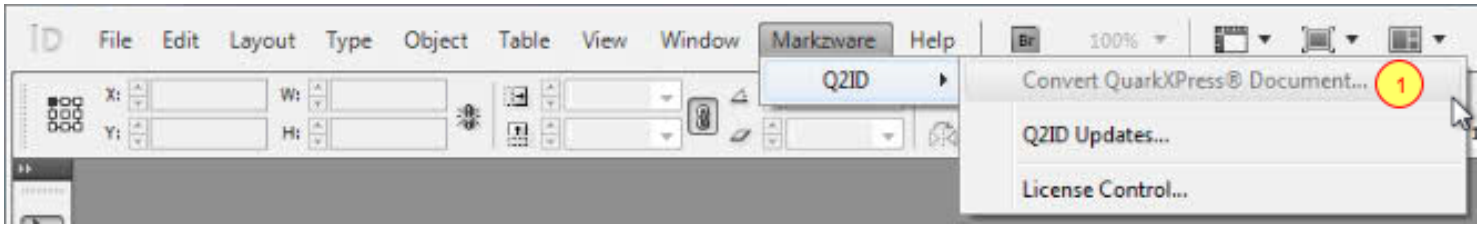

Click the **OK** button

(1) to close this window and return to the main LicenseControl window.

Click the **Done** button (1) to close the LicenseControl window.

009 - Q2ID Win - Q2ID is still installed, but is inactive

You have now deactivated Q2ID, but the Plug-In is still installed. When Q2ID is inactive, the Convert QuarkXPress® Document... menu item is grayed out (1) and you can no longer select Quark 5 and higher documents to convert.

You can still leave the Q2ID Plug-In installed if you wish. You can re-activate it at any time by selecting License Control... and re-entering your License ID. If you leave the Q2ID Plug-In installed in the deactivated state, you will be presented with a LicenseControl Window every time you startup InDesign.

This may be annoying, so you may want to remove the Q2ID Plug-In altogether.

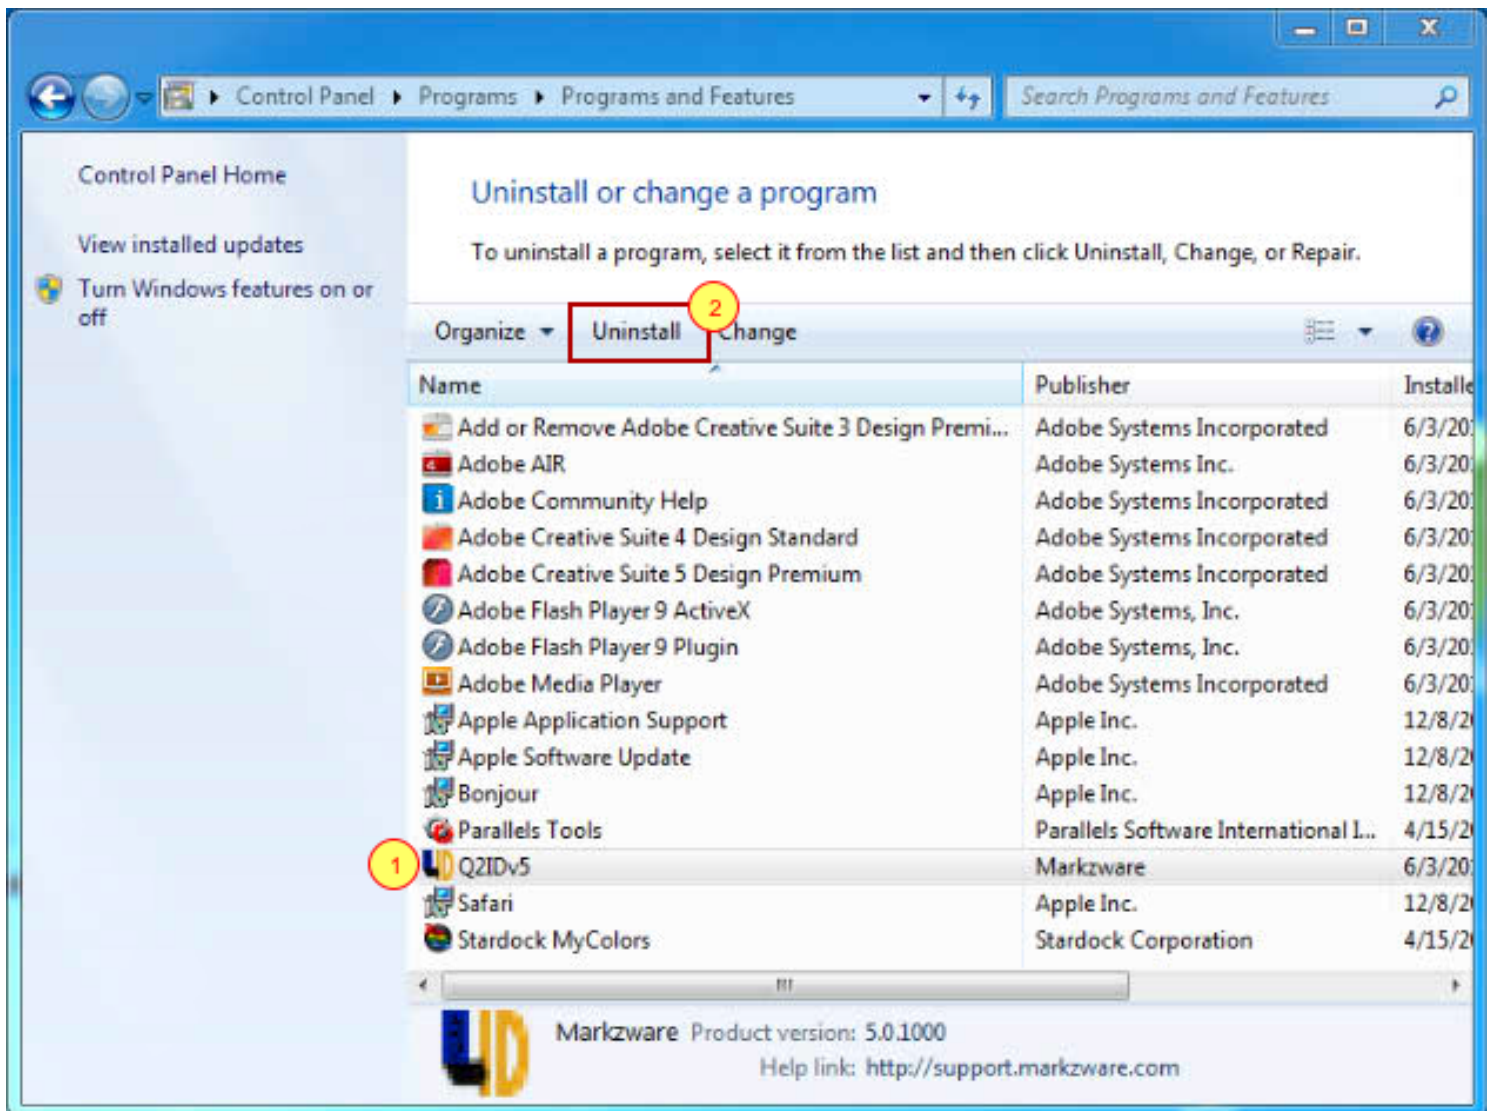

If you wish to remove the Q2ID Plug-In so that the Markzware/Q2ID menu no longer shows up, then proceed to the next step.

Before moving on it is highly recommended that you Quit InDesign. If you do not quit InDesign now, you may lose any open work if you continue with the uninstall process.

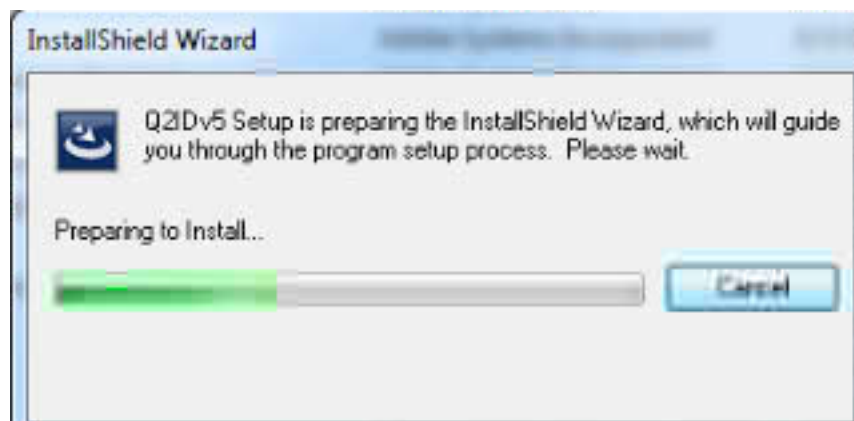

Once you are in the Control Panel, click on Uninstall a program (1)

011 - Q2ID Win - Select program to uninstall

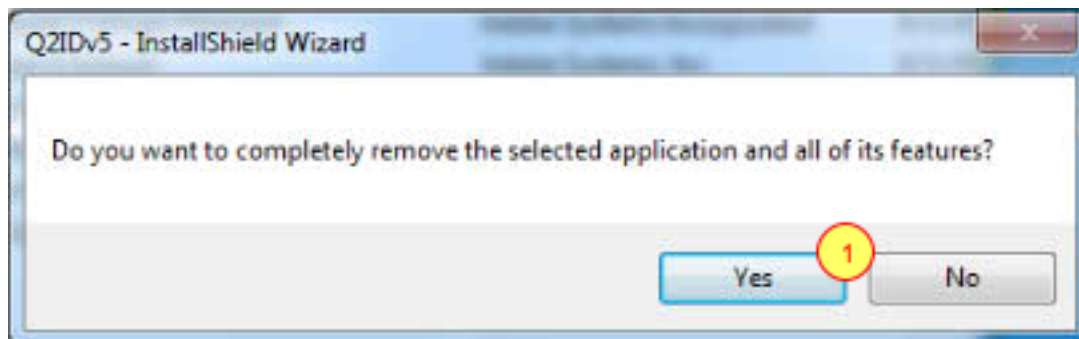

Since you want to uninstall Q2IDv5, highlight Q2IDv5 (1) and then click on Uninstall (2)

012 - Q2ID Win - The InstallShield Wizard starts up

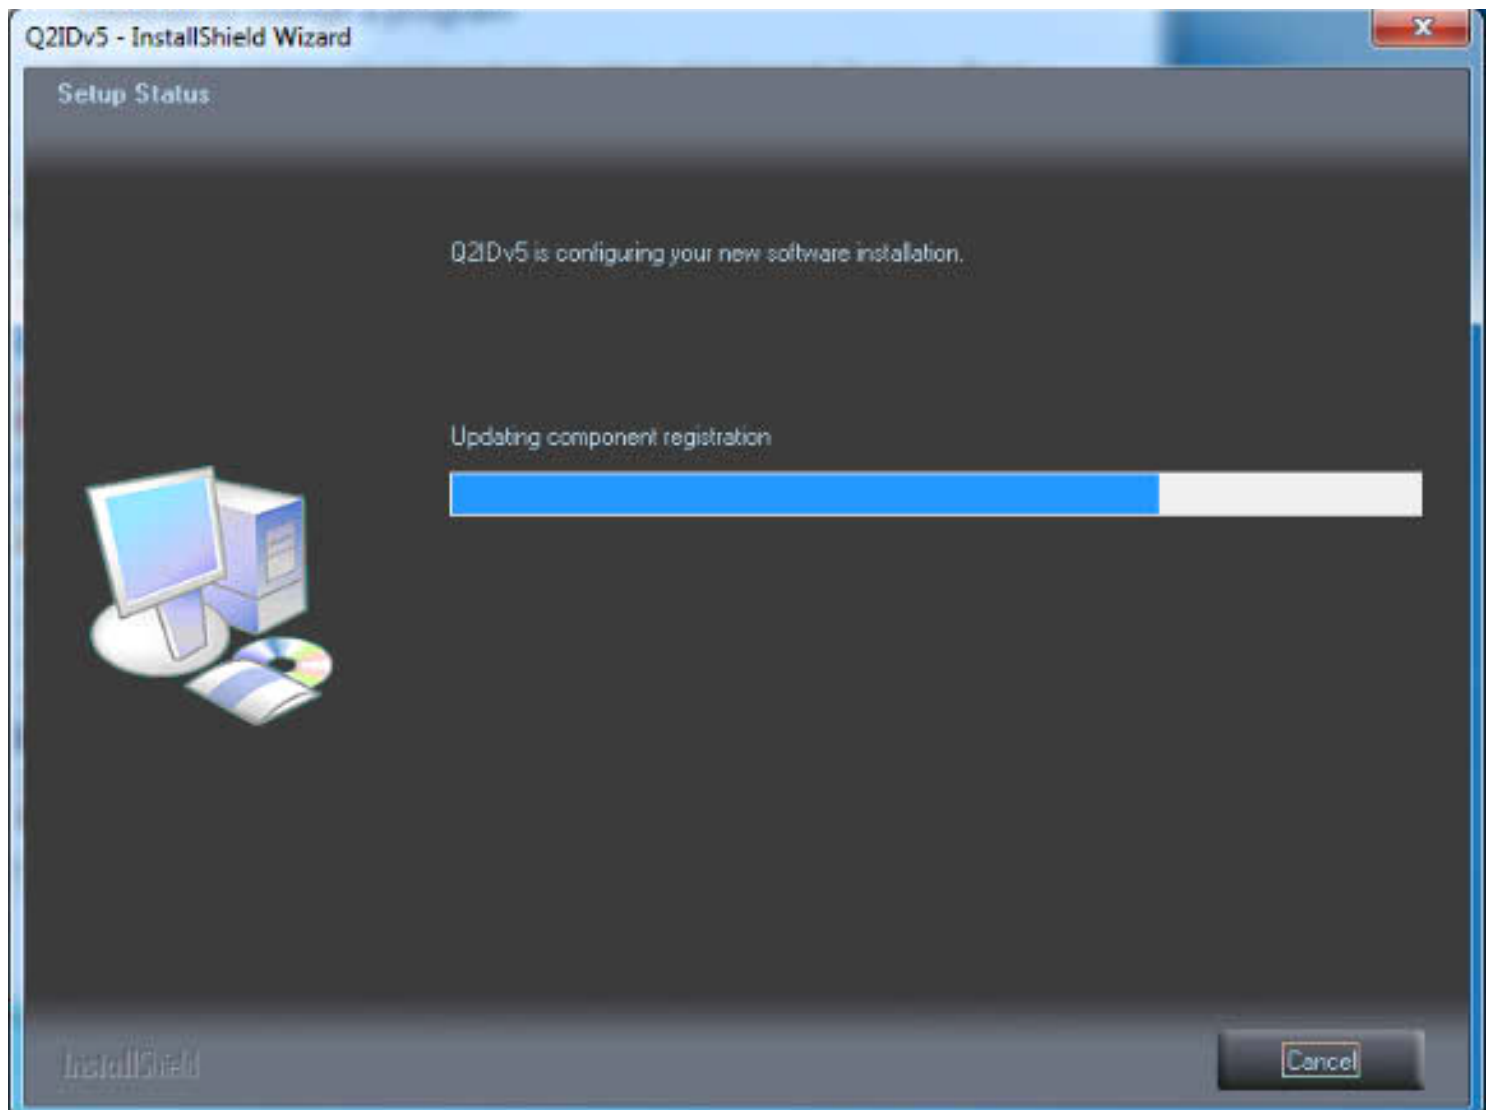

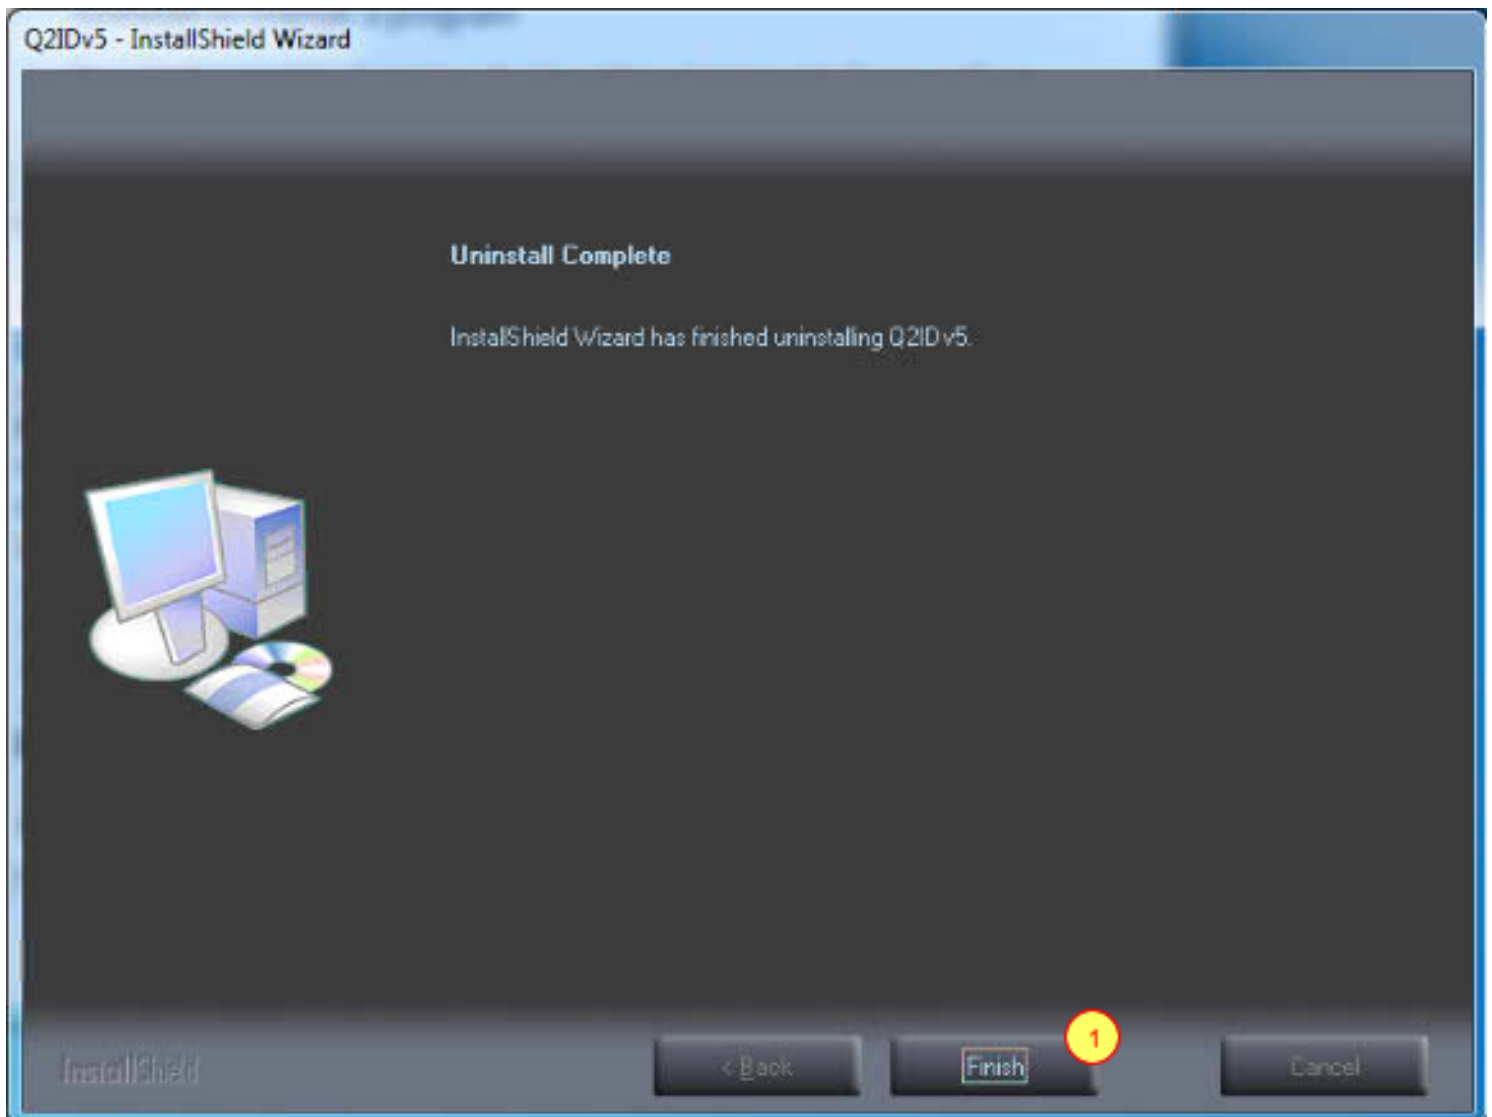

013 - Q2ID Win - Prompt to remove application

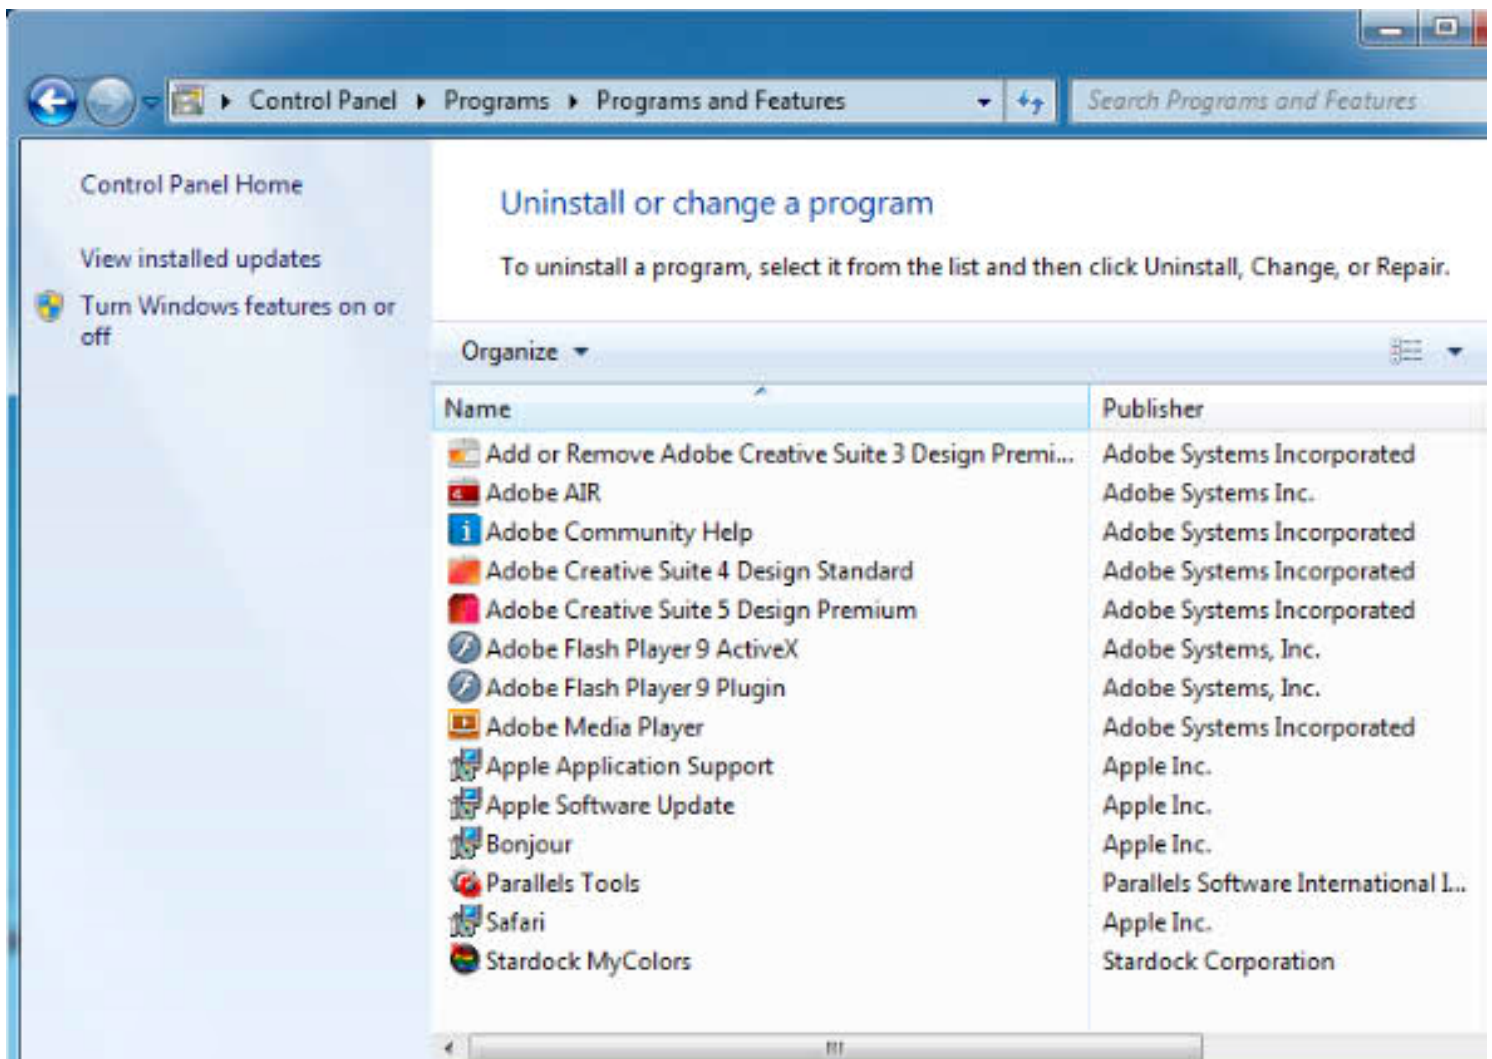

Once the InstallShield Wizard has loaded, you will be prompted whether or not you want to completely remove the selected application (in this case Q2IDv5). Click on **Yes** (1) to begin removing Q2ID.

014 - Q2ID Win - InstallShield Wizard begins removing Q2ID

Once the InstallShield Wizard has finished uninstalling and removing Q2ID you will see the screen pictured above. Click the **Finish** button (1) to close this window and complete the uninstall process.

The Uninstall process physically removes the Q2ID Plug-Ins from your copy (or copies) of InDesign CS4, CS5 & CS5.5. It also removes the Q2IDv5 entry from your Registry.
